

# WORLD'S WEEK

Assoc. Editor, The Edmonton Bulletin

Japan's bills has already given her possession of some of the world's most important sources of tin and rubber and fully important deposits of key minerals. She will have to go much farther and seize Java and Sumatra before she can clinch her hold on the greater part of the rubber territory of the Malay Archipelago and before she can lay hands on any important oil territory.

Thus, if Japan can be stopped in her tracks and prevented from penetrating southward, she will still lack the biggest prizes for which she has risked her national existence.

An analysis of the raw material resources of the Malay Archipelago, coupled with the latest military report produces the following picture of Japan's position today.

**Oil:** The whole Archipelago produced 5,800,000 tons in 1938 and of this amount only 900,000 tons came from Sarawak and Brunei, which are now in Japanese hands. Java and Sumatra are the principal producers.

**Tin:** The Archipelago produces 55 per cent of the world's output and of this amount the most comes from the parts of the Malay states which have not been captured by the Japanese.

**Rubber:** Most deposits are in Johore, the southernmost Malay state, which remains in British hands, and in Dutch territory.

**Iron:** Most deposits so far developed are in the Malay Peninsula, which exported 1,616,000 tons in 1938. Two-thirds came from states already captured by the Japanese.

**Wool:** Most deposits are in the Malay Peninsula, which exported 1,616,000 tons in 1938. Two-thirds came from states already captured by the Japanese.

**Wool:** Most deposits are in the Malay Peninsula, which exported 1,616,000 tons in 1938. Two-thirds came from states already captured by the Japanese.

## THE DUKE OF YORK CHAPTER I.O.D.E. ELECTS OFFICERS FOR YEAR 1942

Raise Over \$400 During 1941 For War Work

At the annual general meeting of the Duke of York Chapter I.O.D.E. held at the home of Mrs. C. R. Moorehouse on Tuesday, January 13th, the following officers were elected for the year 1942:

Regent, Mrs. J. McGowan.  
1st Vice-Regent, Mrs. P.H. Steele.  
2nd Vice-Regent, Mrs. J. H. Oliphant.

3rd Vice-Regent, Mrs. W. Talbot.  
Secretary, Mrs. C. Moorehouse.  
Treasurer, Mrs. J. Whelan.

Educational Secretary, Mrs. Heath.  
Edu. Secretary, Mrs. W. Milligan.  
War Convener, Mrs. J.C. Reed.

Standard Bearer, Mrs. W. Williamson.  
Councillors: Mrs. J. Castiglione, Mrs. H. Brown, Mrs. G. Trepanier, Mrs. J. Cooper, and Mrs. H. Woods.

The chapter has had a successful year and over \$400 was raised in 1941 for war work. Much local boy overseas has been given cigarettes at several occasions during the year, and at Christmas time much local boy overseas was the recipient of a parcel consisting of 1 knitted article, chocolates, cigarettes, razor blades, etc.

Donations were also sent to the following:

Lady Reading, and Queen's Funds for bombed-out areas.  
War Quota Fund.  
Navy Fund.  
Coronation Fund.  
Mission Work in India.

Russia's post-war vision when he visited Moscow.

Whether Russian, British and American attitudes can eventually be synchronized along how London and Washington view the basic principles enunciated by Stalin and his foreign commissar, M. Molotov.

While the recent Russian successes have strengthened the Soviet government's position, encouraged nationalistic feeling among the people and enabled the government to maintain a strongly independent attitude in international relations, most Russians realize that there is a long, hard road ahead and that full help and cooperation of Britain and America is necessary to achieve the final downfall of Hitlerism.

Russian appreciation of that help will be measurable by the extent of British and American military operations in western Europe, America and Asia and by the extent of material assistance to the Soviet Union.

There seems to be no doubt about Russia's determination to go on with this war until Hitlerism is crushed. It is especially pleasing to the Russians to see the Americans sacrificing their easy way of life for the first regime of self-denial so necessary to victory.

This to them is a sure sign that America means business.

GIANT COASTAL GUNS ON GUARD IN BRITAIN—Among the shores of Britain, like a mighty ring of steel, stand the coastal defense guns. Day and night they are manned for instant action by expert gun-crews who are maintaining their efficiency by exercises in all conditions of weather. This picture is of a unit of a British coastal defense battery showing gunners at their station.

## LOCAL MINE WORKERS DONATE \$75 TO RUSSIAN RED CROSS

Members of the local United Mine Workers of America donated the sum of \$75 recently when a drive was made for funds in aid of the Russian Red Cross. The above amount has been sent in to headquarters by Mr. B.C. Downey, secretary-treasurer of the Carbon branch of the Red Cross Society, the donation is greatly appreciated.

Forty-one members of the Union contributed to the cause.

## UNREGISTERED FIRMS GIVEN TILL MARCH 31

A drastic change in the licensing requirements of the Wartime Prices and Trade Board is announced from Ottawa, following study by board officials to achieve the utmost simplification.

All business firms, or persons engaged in business for themselves and who have not already done so, must register with the board before March 31. The only exceptions are operators of private boarding houses, farmers, gardeners, fishermen and livestock and poultry dealers, unless they buy goods for resale.

All licensees receive a number which he continues to hold as long as wartime price control lasts unless it is cancelled or suspended for violation of board orders. Licensees are no longer required to record their license numbers and names, but must produce their license identification cards if requested by an official of the board.

There is no charge for the license. Persons or firms who have registered under the former regulations need not change name. Employees do not require licenses. All licensees must notify the board in writing within ten days of any change of name, address, ownership or character of business.

The regional licensing office for Alberta is at 228 Taylor Bldg., Edmonton, where inquiries may be made.

## THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.L. STRANGE

An authoritative agricultural organization in Alberta, that has the respect of all, has recommended that the Dominion Minister of Agriculture that the license for Golden Beldur Durum wheat shall be revoked. If this is done it means that no one would be permitted to advertise, or to offer for sale, or to sell, or to have in their possession for sale, for the purpose of sowing in Canada, any Golden Beldur wheat. This in turn would very quickly eliminate the variety from production and use.

Golden Beldur is a low quality Durum wheat, and makes the poorest kind of meal. It is the worst Durum wheat in the world. Under present regulations Golden Beldur Durum is allowed by the Dominion Grain Inspection Department, only to be used in the lower grades. There are other varieties of Durum that are of far better quality than Golden Beldur and which yield as high.

I have seen the poor quality meal that Golden Beldur Durum makes, and so I strongly advise farmers to stop the recommendation to the Minister made by the Alberta authority.

## ANNUAL MEETING OF CARBON RED CROSS SOCIETY

The annual meeting of the Carbon branch of the Canadian Red Cross Society will be held in the Farmers' Exchange hall on Friday evening, January 23rd, at 8 p.m. It is hoped that a large attendance will be on hand to lend their support to an organization which is vitally necessary to provide comforts and supplies to our fighting forces, and bombed-out friends in the Mother country.

## WAR TIME PRICES AND TRADE BOARD REVIEWS SOME OF ITS PROBLEMS

Under new regulations of the War Time Prices and Trade Board, all "charge accounts" owing at the end of this month, must be paid within ten days, otherwise the merchant is prohibited from selling the customer who has been in default of a long list of manufactured articles. If payment in full is not possible, the customer may lay one-third in cash and arrange to pay the balance in monthly instalments. Succeeding monthly accounts must be liquidated within ten days after the end of the month.

Certain exceptions in regard to outstanding goods on extended credit made in the case of farmers, fishermen, prospectors, trappers and others engaged in seasonal industries of a primary or extractive nature.

Strange as it may seem, under the Wartime Prices and Trade Board regulations, housewives will be enabled to purchase a considerable number of imported articles at less than actual cost. This is due to the difficulty of fixing prices which importers must pay in fluctuating import markets.

Here's how the Board has worked it out, taking tea for an example. Tea that sold for 75 cents a pound during the base period between September 1st and October 1st, now may cost the storekeeper several cents a pound more than that to buy at wholesale.

The Board requires him still to sell at 75 cents a pound, but he can claim against his wholesaler who claims against the importer. On his establishing the actual difference between past and present import prices the Board will pay the importer a subsidy for this difference. This principle will apply in the case of all imported goods, which have risen in price to the importer, but which the Board requires shall be sold to the ultimate consumer at prices in force between September 1st and October 1st last.

Mr. and Mrs. Len Poxon and Mr. and Mrs. Fred Besant spent Sunday in Drumheller visiting with Mr. and Mrs. W. Poxon.

Stewart Tjelt of Didsbury is visiting this week with his sister, Mrs. E.J. Elliott.

Gophers are reported to have been seen near Carbon during the past week.

Mr. and Mrs. Dick Gindell and Dale were Calgary visitors last Thursday.

Frank Skerry, who is on the section at Crowfoot, was a Carbon visitor on Saturday, taking back a Whippet car which he obtained from Alex Reid.

Fred Priebe and Charlie Pattison made the rounds of the local golf course on Sunday and report the links in good condition for this time of year.

F. B. Barker left Tuesday for a few weeks visit in the East, where his husband, Frank Barker, of the RCAF is at present stationed.

Born to Mr. and Mrs. James Buckwell (nee Irene Grenier) on Sunday, January 18th, a son.

The Ladies' Aid of Carbon United Church are holding a supper in the Church on Wednesday, January 22nd, which will be followed by the Annual Meeting of the Church. A good attendance is requested.

FOR SALE—1 grain elevator (high) and 1 return elevator off 30 in. separator, in good shape. Also good 14-foot Garden City feeder and other parts. Apply to R. Garrett, Carbon.

Mrs. Wm. Levins and Chas. Cave were Calgary visitors the first of the week.

Howard C. Lecuyer of Drumheller appeared in Carbon police court Monday charged by Const. Amy of the R.C.M.P. with driving his truck at an excessive rate of speed on No. 9 Highway. This being his second offence, Magistrate Hawkins assessed a fine of \$25.00 and costs. Lecuyer was also charged with carrying a passenger in his truck and an additional fine of \$10.00 and costs was levied.

## MEMBERS OF CARBON MASONIC LODGE PUT ON SPLENDID SOCIAL EVENING

Banquet and Cards are on Evening's Program

Members of Carbon Lodge No. 107, A.F. & A.M. entertained their ladies at a social evening in the Masonic hall on Wednesday, January 14th.

Over sixty persons sat down to a splendid banquet, served up by the lodge members, and the following social program was carried out under the able direction of Master of Ceremonies, B.C. Downey.

Toast to the King, proposed by the chairman.

Toast to the ladies, proposed by Rev. R.R. Hinchey, and responded to by Mrs. Cyril Poxon.

Toast to the visitors, responded by A.P. McKibbin and proposed by F.E. Priebe.

Over sixty persons sat down to a splendid banquet, served up by the lodge members, and the following social program was carried out under the able direction of Master of Ceremonies, B.C. Downey.

Community singing led by Len Poxon and accompanied at the piano by Mrs. McKibbin, rounded out the program, and the remainder of the evening was spent in cards.

What prizes were won by Mrs. Alf Hovick and V.E. Hawkins, and Bridge prizes went to Mrs. Jas. Smith and J.J. Harvey.

## CARBON AND DISTRICT NEWS NOTES

Dale Poxon visited in Drumheller for a few days last week with Mr. and Mrs. W. Poxon.

Rev. H.T. Chapman was a business visitor to Hanna Monday.

Alex Todd of Olds arrived in Carbon last week and is working at the Fox mine.

S.J. Garrett, accompanied by members of his staff, Ross Dunlop and Harry Woods, attended a General Motors meeting in Calgary Monday.

There was sufficient frost on Monday and Tuesday to permit cutting and skidding, after a week's delay due to warm weather.

A.F. McKibbin, local druggist, completed 15 years in business on Monday, January 19th, in Carbon, having purchased the drug store business from the late "Hingo" Brown. Prior to 1926 McKibbin owned a drug store at Carmanville.

Mrs. Harvey received wordable cable from her son, Sergeant Harvey, stating that he had been to Scotland to visit relatives, and was enjoying himself so far.

WORLD HAPPENINGS  
BRIEFLY TOLD

All ranks of the Canadian Women's Army Corps are permitted to wear the "Canada" badge, it was announced in corps orders.

The provisional government of Czechoslovakia was added to the list of governments eligible for American lend-lease aid.

A German troop leader was arrested while photographing a Stockholm naval establishment and will be tried for espionage.

Otto Skismar, 33, noted actor and father of the monogami and actress, Cornelia Otto Skismar, died recently in New York.

Radio beams are in operation along the air route from Edmonton to Alaska, enabling commercial and military aircraft to fly over the route in all kinds of weather.

The United States army and navy announced they are ready to place orders aggregating more than \$5,000,000 now to help convert the motor car industry to armament production.

A German despatch from Copenhagen said that every Danish citizen will be required to give up 10 per cent of his weekly water ration so that supplies of Danish butter can be sent to Finland.

Austrian soldiers who joined the Pioneer Corps, only unit open to "enemy aliens" when Britain went to war, are now being British subjects transferring to other British units, some with the rank of officers.

Newgranges in the village where British commandos landed on Naegle island, off the coast of Nazi-held Norway, were cut 10,000 kroner—\$2,000—because the German military cables were cut in 35 places.

## No Longer True

LI-CO, George Solman, Nazi military writer, will have the eastern German army in agreement with him when he frankly admits that while the Russian soldier was "distinctly inferior" to the German soldier during the Great War, that is no longer true.

## Make Barrage Balloons

British Women Work in Factory Where No Men Allowed

No men allowed in this factory anywhere in Wales.

Only women and a few made-in-American sewing machines are employed. Their products are the huge barrage balloons guarding English cities and port towns, made with nimble, feminine hands.

A typical balloon is made of panels 140 meters wide, of aluminum coated cloth glued together at the edges, reinforced with stitching, then more glue and tape inside as well as out. Two miles of tape are used in just one balloon and there are over 500 small accessories that make up the line, the rudders, the moorings and rigging.

The balloons over London look light and free, but I saw 12 people struggling to carry a 600-pound deflated bag.

A balloon contains an animal-like diaphragm. In the factory they call it a balloon, but in all reality it is a diaphragm. The lighter-than-air gas goes into the upper compartment and the air underneath. The diaphragm, like ours, moves up and down with the expansion and contraction of the gas inside.

The fin on a Hyde Park balloon looks absurdly small, but one can stand in one just like it with lots of overhead room to spare.

Draftswomen cut out and cut the material into intricate patterns and girls scrape the aluminum off the edge in preparation for gluing. The sewing is done with American machines, and the balloon parts go on to the pasting room.

It's not like cutting paper dolls. There is accurate work, accurate to a small fraction of a millimeter. Government inspectors, in noticeable white frocks, work continually with their gauges checking and rechecking to see that no errors are made.

## Riding A Moose

Seasooned Algonquins Guide Says It Is A Dangerous Practice

Ever ride a moose? Bareback on a bull moose, guide of the forests? Oscar Boyer of Pangnien has and he says "it's courting suicide" to try it on a dry land although it can be done with a degree of safety when the animal is in the water.

Oscar, who is one of the best moose guides in Algonquin, and is skilled in forest lore, is usually regarded as the only man in Canada to have ventured on a moose's back. Here's what he says about his adventure:

"I had an idea ever since I was 12 that if people could ride horses and other animals I could ride an Algonquin moose. I tried it out somewhere later in life. There was a moose swimming. I got on its back straight. I soon learned to get into such a position that its hooves would not hit me as it swam but I made the mistake of hanging on once it hit the shore. A moose can go like the wind. I hung on for about 15 minutes when the brush and overhanging branches of trees through which the moose hurried itself swept me right off its back. Never hanging on to a moose when it hits dry land. It's courting suicide."

## Saved By His Hair

Wild Tribesman Of Luzon Knew Airman Was Not A Jay

One American pilot who baled out of his plane over the wild mountains of Central Luzon, inhabited by fierce Kalinga tribesmen, literally escaped death by a hair—or rather a head of hair.

Floating to escape the pilot saw a whole village of Kalinga tribesmen, who seldom are able to distinguish among foreigners, shouting and waving their spears and bows.

The pilot didn't speak the dialect. Besides, he knew there wouldn't be much chance for conversation, since Japanese air bombs already had killed several Kalingas. But as he hit the ground the Kalingas lowered their spears. This incident definitely was not a Japanese hair. He had a shock of flaming red hair.

If you have a date with your best keu, wear this... one of the prettiest styles designed for the young figure by Anne Adams! It's Pattern 4941, and easy-to-make in addition. See that long-line blouse bodice and the twin panels in the front of the skirt! Both make you will look slim... the V-neck does too! Accent this frock with the hand-embroidered blouse—it's especially from the transfer motif. The blouse may be further enhanced by the use of tons or a slide fastener at the centre seam. There's a choice of short, three-quarter or long sleeves, and the bodice may be made of contrast fabric. Let the sewing instructor show you how to finish quickly—a black crepe frock with gold-flecked embroidery would be a stunning choice. Pattern 4941 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 takes 3½ yards 39 inch.

Send twenty cents (20c) in coins (clippings cannot be accepted) for the Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 170 McLeod Ave. E., Winnipeg, Man.

## REG'LAR FELLERS—Won't Pud Be Surprised!

MISTER, COULD YOU FIX THIS FENDER, SO MY BROTHER, RUDNHEAD, WON'T KNOW I SMASHED IT?

WE CAN'T DO THAT, BUT I CAN FIX IT FOR HIM TOMORROW. NOW HE DID IT!

PLANES OF THE RCAF  
and how to spot them  
APPROVED BY THE ROYAL CANADIAN AIR FORCE

Whitley

Heavy Bomber

DEFINITELY in the class of the "heavies" is the Armstrong-Whitley and despite its unorthodox appearance is for its purpose a most efficient and successful aircraft.

It has taken a large and important part in the raiding into enemy territory ever since the war started. Primarily it is used for night operations owing to its relatively low speed, and its high load capacity of almost two tons.

Whitley's wing span is almost 85 feet, with an overall length of 70 feet. It is of all-metal construction, with retractable landing gear, and powered with two Rolls-Royce Merlin liquid-cooled engines of 1,000-h.p. each, giving a top speed of 245 m.p.h. with a range of 1,400 miles at cruising speed of 180 miles per hour. It is easily distinguished by the long box-like shape of the fuselage and the twin fins and rudders. Machine-guns are mounted in power-operated turrets in both the nose and tail. The normal crew consists of five—two pilots, navigator and bomb-aimer, a rear gunner and radio operator.

## The Bohuque Courtsuons

An army officer walked into the office of a subordinate at 4 p.m., quitting time. Next morning the subordinate found this memo addressed to him: "I came into your office at 4 o'clock yesterday and felt your chair; it wasn't even warm."

As a contemporary says it, the delightful thing about winter is the winter clothes have more pockets one can fill up with stuff.

The Cathedral of St. George, dedicated in 1902, is the second largest Gothic edifice in Europe.

## LIFE'S LIKE THAT

It's simple, boss... You went on daylight saving and I didn't... that's all!

## By Fred Neher

Vancouver Island was circumnavigated by Capt. George Vancouver in 1792.

He decided to ask his boss for a raise. "I'm in such a bad financial position," he said, "that I can't even pay a pair of shoes—not even a pair of socks!"

"Then you'll have to go," the boss told him. "I'm sorry, but bare feet will not be tolerated in this office."

Teacher: "Name the five zones." Pupils: "Temperate, intemperate, war, postal and o'."

Old Moore's Almanac, published in 1967, reports for 1942:

"Clearly the outlook for Hitler is bad."

"He has his progressed ascendant opposite Neptune and Saturn, and the Neptune transit near about this point in May, 1942. Furthermore, the next conjunction of Saturn and Mars—in February, 1942—falls out of the ascendant of the foundation map of the Third Reich."

Old Moore's sums this up in plain language: "Somewhere between the earliest and latest of these dates first Hitler, and then Nazism, will crash."

The "culmination of Jupiter in Japan" during February will give Premier Hideki Tojo's boys trouble, and peace will come early in the summer, the almanack adds.

Gold production in Canada during the first eight months of 1941 aggregated 3,560,129 ounces as against 3,560,276 in 1940.

At the approach of winter frogs burrow into the mud at the bottom of ponds where they stay until the approach of spring.

SUNDAY SCHOOL LESSON  
JANUARY 25

JOHN THE BAPTIST AND JESUS

Golden text: Thou art my beloved Son; in thee I am well pleased. Luke 3:22.

Lesson: Matthew 3:1-17; Mark 1:1-11; Luke 3:1-22.

Explanations and Comments

John's Testimony concerning Jesus, Luke 3:15-17. The coming of the Messiah was expected at this time, and the people began to wonder whether or not John might be he. But John told them that while he baptized them with water, there was One coming. One far mightier than he, the thing of whose shoe he himself was not worthy to untie. John had spoken to the people about their sins in tones of royal authority, but as he compares himself with the coming One he speaks with the deepest humility. "He shall baptize you in the Holy Spirit and in fire." John says in effect: "I can bring you to repentance but no farther. My baptism gives no grace. His baptism will give you new spiritual life, inward sanctification, holy fervor and zeal in God's service" (Lambert).

"Take a modern Jew who has been converted into the Christian fold, and you will find that one of the favorite phrases by which he tries to give expression to his experience is this, 'I feel a burning within me.' What does he mean? He means that the sense of fiery discipline by the law has become changed to a consciousness of warm discipline to a living God who is baptizing him, now he is baptized with fire" (J. H. Jewett).

John's Baptism of Jesus, Luke 3:21, 22. Matthew and Mark (Mt. 3:13; Mk. 1:9) inform us that Jesus came from Nazareth of Galilee and was baptized by John in the Jordan.

Matthew reports the conversation between Jesus and John in which John humbly exclaimed, "I have need to be baptized of thee, and comest thou to me?" and Jesus answered, "Suffer it to be now; for thus it becometh us to fulfill all righteousness." At three Evangelists mention the rending of heaven, the descent of the Spirit as a dove, and the utterance of the words, "Thou art my beloved Son; in thee I am well pleased." Luke tells us that it was as Jesus was praying that these things happened.

Matthew, the oldest of the ascending dove and heaven voice tells us that at some special way God's spirit rested upon Jesus and he became aware of the divine anointing for his task. "After a long period of loyalty in obscure and monotonous life, came this outpouring of this Divine Spirit—the uplifting in his soul of a living God, which augmented his natural energies."

Old Moore's Almanac

Astrologers See The Finish Of Hitler

In 1942 Astrologers who call the heavens for signs of the future are agreed that the moon, Jupiter, Venus, Neptune, Mars and the rest are going to put the box on Hitler, Hirohito & Company in 1942.

Old Moore's Almanac, published in 1967, reports for 1942:

"Clearly the outlook for Hitler is bad."

"He has his progressed ascendant opposite Neptune and Saturn, and the Neptune transit near about this point in May, 1942. Furthermore, the next conjunction of Saturn and Mars—in February, 1942—falls out of the ascendant of the foundation map of the Third Reich."

Old Moore's sums this up in plain language: "Somewhere between the earliest and latest of these dates first Hitler, and then Nazism, will crash."

The "culmination of Jupiter in Japan" during February will give Premier Hideki Tojo's boys trouble, and peace will come early in the summer, the almanack adds.

Gold production in Canada during the first eight months of 1941 aggregated 3,560,129 ounces as against 3,560,276 in 1940.

Health LEAGUE OF CANADA  
TOPICS  
VITAL INTEREST

NATIONAL HEALTH EDUCATION

In an article in the United Church Observer, Dr. Gordon Bates, General Director of the Health League of Canada, has called upon the federal government to assume leadership in a national health education campaign, to call regular conferences with the provinces, and to plan carefully specific health programs on a national scale.

Dr. Bates, in his article, argues that neglect of the problem of national health costs the Dominion government nothing. He points out that costs of sickness are borne by the provinces, not by the Federal government. He states that Ottawa would be swifter to act if the provinces dumped the cost of sickness on to the federal government to pay.

But provincial institutions, hospitals, sanatoria, etc., for the care of the sick, are not paid for by provincial governments.

"The present system under which we have nine different health programs with little or no attempt to deal with any health program on a national scale, is far from satisfactory," he points out.

One province, for instance, has achieved something remarkable in the setting up of a physical fitness program for youth. But little is done in the other provinces along this line.

One province, for instance, has achieved something remarkable in the setting up of a physical fitness program for youth. But little is done in the other provinces along this line.

## BRITAIN PLANS FOR PROTECTION OF AIRDROMES

London.—Britain is creating a special defence corps for protection of its airdromes from "vertical envelopment" by airborne troops such as won Crete for Germany and the troops will be commanded by Major-General Claude Liarlet, Colonial Secretary Lord Moyne announced.

The corps will operate under the Royal Air Force. Gen. Liarlet, 60, has been in command of London's territorial since 1938. He entered the artillery 43 years ago and in the first Great War earned the Distinguished Service Order and was five times cited in despatches.

An official spokesman said the corps will be under the control of the air council.

He said that while the army's responsibility for the ground defence as a whole would be maintained, the Royal Air Force "under military direction and as the agent for the army" would "undertake the entire local defence arrangements for airdromes."

A director-general of ground defence in the air ministry has been appointed and will be given the title of commander, he said.

Loss of the airdrome at Toucan on the east coast of Malaya resulted in a flood of questions and Conservative, Liberal and Labor members asked notice they wanted positive answers to questions in the next session of commons about measures to prevent the loss of other air bases.

A decision to create a force responsible for protection of landing fields was understood to have been reached at recent meetings of the war cabinet in response to growing alarm over repeated loss of air bases in Norway, France, Greece, Crete and Malaya.

He said the new corps to defend R.A.F. naval and ministry of aircraft production airdromes would function only in the United Kingdom and would be called the "R.A.F. Regiment." He added it would be equipped with infantry arms, artillery and armored fighting vehicles.

Although the R.A.F. was responsible for maintenance, the defence corps would be under army direction, it was stated.

There was no hint of the size of the new airdrome defence group. No hint was given as to plans to protect airdromes of such outposts as Malaya.

## To Spend Billions

### United States Budget Is The Largest In History

Washington.—Here are listed in round figures the billions the United States proposes to spend during the fiscal year beginning next July—the biggest budget in the history of the world:

\$50,000,000,000 for war.  
\$4,250,000,000 for normal government costs, relief, farm aid, etc.  
\$1,750,000,000 for interest on the public debt.

And here is the method of payment: \$16,500,000,000 from existing tax laws. \$7,000,000,000 in new general taxes. \$2,000,000,000 in new social security taxes. \$35,000,000,000 from treasury borrowing, plus additional borrowing by government non-budgetary agencies.

Spending will jump from the present \$2,000,000,000 to \$5,000,000,000 a month.

The First Great War spending peak—\$18,500,000,000—will be passed this year and almost tripled during the next fiscal year.

The public debt, after borrowing, will be \$110,000,000,000.

### Gas Rationing Coming

Ottawa.—Gasoline rationing will come April 1 as scheduled, Munitions Minister Howe said at a press conference. He said it was impossible to estimate at this time just what the allotments of gasoline would amount to for the first rationing period.

### Adhere To Charter

London.—The Danish council, representing the free Danes in Britain and Northern Ireland, voted adherence to the Atlantic charter and the principles of the united nations' pact just as if that declaration had been signed by a free Danish government.

### Relations Broken

Cairo.—Egypt decided to break off diplomatic relations with Bulgaria and Finland, on both of whom Great Britain has declared war. The decision also has been taken concerning the Vichy French government.

## Memorial At Vimy Ridge

Is Still Standing But Custodian Intended To Destroy It  
Montreal.—George H. Stubbs, custodian of the Canadian war memorial at Vimy Ridge, is safe and well, but a prisoner of war in a camp at St. Denis, France, according to a letter received here by George S. Layton of the Canadian Legion war services. He expressed appreciation for three Red Cross parcels he had received but said "we have had a rough time." Married, he lived in a house built by the Canadian government on Vimy Ridge.

"The memorial is still standing," Stubbs said in his letter, adding that "the upkeep has not been looked into so I expect to have quite a lot to do after this war."

He said there are 160 Canadians in the camp where he is interned.

## Dutch Precautions

### Scorched Earth Policy To Save Oil Wells From Falling To Axis

Sydney.—H. J. Van Moek, lieutenant-governor of the Netherlands East Indies, disclosed that the colony for a year had been preparing a scorched earth plan to prevent its oil fields and industries from falling into Japanese hands.

He said plants had been removed from threatened areas or preparations made to dismantle them while those which could not be moved would be destroyed.

He said he was not at all sure, he said, but he acknowledged the Japanese probably could bring them into production again within six months.

## REPORT A SPLIT IN THE NAZI PARTY OVER SOVIET WAR

New York.—A split between the Nazi party and a group of German generals and outbreaks of dissension, hunger and disease among German troops on the Russian front were related by the New York Times in a dispatch from Washington.

The Times said the story of conditions in the German armed forces was told in an official report "by one of the governments of the united nations" to the United States war department. The department did not authenticate or comment upon the document nor did it release it. The newspaper did not say where it obtained the information contained in the report.

Agents inside Russia, Germany and France co-operated in gathering the information contained in the report, said the dispatch. It listed 1,200,000 German soldiers and 25,000 officers as having been killed or missing in Russia up to Dec. 1. The report said these figures did not take into account the Germans who were wounded or taken prisoner.

The dispatch continued:

In addition to these losses in personnel, the report said that 12 German armored divisions were smashed out of the 21 armored divisions the Germans threw into the eastern campaign. The extent of these losses could be gauged, the document noted, by recalling that the Germans completed the conquest of Poland with only nine armored divisions.

These losses, plus the violent and relentless Russian attacks in sub-zero weather, have been inflicted, the report commented, on an army that is fighting without shelter and often without adequate supplies of food. The German supply lines, which worked well over vast distances in moderate weather, had often broken down during the cold retreat, resulting in hunger and disease.

These factors, the report asserted, had led to a deep division between the leaders of the Nazi party and a group of German generals who are said to have insisted as early as Oct. 15 that the losses in the ranks on the eastern front were so heavy that major operations should be halted or postponed.

The dispatch said the report declared that as early as October, there was evidence of an army plot to take over command of Germany. Admiral Canaris, head of the German intelligence service, and a General Marschner were said to be in charge of the purported army revolt. This group, according to the report, has its own broadcasting station which nightly criticizes the Nazis and Hitler's policies.

The report concluded, however, that Hitler continues to be popular and that the German people do not yet have the organization for a successful push.

## PRODUCTION OF MUNITIONS MOUNT TO A HIGH PEAK

Ottawa.—Munitions produced in Canada are mounting the Axis powers on every battlefield and on every ocean and production is expected to rise rapidly as at any time since the war started. Munitions Minister Howe told a press conference.

Mr. Howe, who held conferences with Lord Beaverbrook, British supply minister, in Washington during the holiday season, said the latter's mission to America had been to "ask us to raise our sights on war production objects."

Canada could and would make a proportionate increase in production, the minister said, but it would not be so striking as that of the United States because Canada had already reached a higher peak proportionately than the American republic before the latter entered the war.

The minister would not release many figures for publication but said contracts and commitments for production for Canada and Great Britain have exceeded \$3,500,000,000 since July 1939, and would proceed at an increased tempo.

He said tank production would exceed 1,500 vehicles in 1942 and that several carriers would pass the 9,000 mark. There would be sharp increases in aircraft and all other production.

Under the new production agreement with the United States Canada was placed on a parity with the American army, navy and maritime commission in regard to steel priorities and tariff barriers were being hurdled in respect of imported materials going into Canadian manufacture of American orders.

More than 90 per cent of all Egyptian tanks are Moslems.

## IN SUPREME COMMAND

Appointed to command the U.S. fleet, Admiral Ernest J. King will have supreme direction of the U.S. forces in the Atlantic, Pacific and Asiatic waters. Frank Knox, secretary of the navy, announced the appointment on Dec. 20. Admiral King was formerly in command of the U.S. Atlantic fleet.

## Under A Truce

### Italian Medical Officer Conducts Wounded Britishers To Friends

Called—Five wounded airmen, members of the crew of a British bomber which crashed within the defenses at Halifax, were brought out under a white flag by an Italian medical officer to receive the attention from South Africans being the position.

The officer, who was permitted to pass through the lines unmolested, called the Italians in Halifax lack medical supplies and it was only humane to bring the airmen to their friends.

The South Africans sent the Italian back under safe conduct with a large supply of surgical dressings.

## Convoy Defence Improved

### More Enemy Submarines Are Being Destroyed In Atlantic

London.—The recent admiralty announcement of the sinking of three German submarines in the defence of an Atlantic convoy "points to the improved efficiency of our attack which puts an enemy submarine out of commission immediately and makes escape in a damaged condition impossible," a British authority said.

He warned against any assumption that capture of prisoners from U-boats was the result of deterioration of morale among the German crews.

A recent German announcement of the transfer of submarines from the Atlantic to the Mediterranean, he said, "might indicate that this move was due to more effective defence of Atlantic convoys and that German U-boats there were not paid dividends."

"One obvious reason" for the transfer, he said, was to increase operations against British naval units and convoys in the Mediterranean because of the effect these were having in the Battle of Libya.

The German command also might be trying to draw off the Atlantic defence," he commented.

## Must Turn In Uniforms

### Japanese Banned From Canadian Officers' Training Corps In B.C.

Vancouver.—Notices have been posted at the University of British Columbia asking Japanese students who were members of the Canadian officers' training corps to turn in their equipment and uniforms.

"It was thought advisable to take this action because of the present situation," President L. S. Killick said in announcing that decision to ban the Japanese was reached at a meeting of the committee on military education Jan. 2.

More than 70 Japanese members of the corps are affected by the ban.

## MORE RUSSIAN TROOPS MOVING UP TO THE FRONT

London.—The B.L.C. quoted "Message from Kulyabsev saying" Soviet troops are moving in an ever widening front toward Sevastopol and have forced the Germans to lift the siege at that great naval base to meet threats from the east, west and north of the peninsula.

Vast columns of newly-trained troops from Russia's almost limitless reserves were reported moving up to the central front, where the Soviet offensive was rolling on toward a great collision with German forces attempting to dig in on the Vyazma-Bransk line 130 miles westward beyond Moscow and halfway back to Smolensk.

Information from reliable quarters here that the command of the Red army's centre had just begun to draw up the "new" reserve, more than a month of unending offensive action against the invaders, who coupled with the new troops, fresh troops are to some degree equipped with captured Nazi arms.

And thousands of captured German reserves of manpower which they are tapping as fast as they can be armed, a reliable informant asserted.

"The Red army now is on an offensive largely powered by troops trained in the six months since the war started—and this training is going on at a rate that more than makes up for battle losses."

Russian advances in frozen Karelia and in the Crimea also were reported, along with the steady Moscow front push which recaptured Meshchov, deep in the German centre.

Moshevskoy has 120 miles south-east of Moscow and 40 miles south of the Vyazma-Bransk line on which the invaders were expected to attempt to dig in for the winter.

Representing a 40-mile advance from Kaluga, it becomes the base of a Soviet spearhead at the southern tip of the Moscow region offensive—anchored in the north at Staritsa on the Volga—which is menacing Moscow.

At the same time, German stronghold 75 miles west of the capital.

## Jap Bombing

### Ruthless Methods Used Against Defenceless Towns

Washington.—The United States war department said that Gen. Douglas MacArthur had received reports of widespread damage to defenceless towns in Luzon by Japanese air raiders.

"Merelylessly bombed," the war department said, were the Philippine towns of Balat, Santa Rosa, Calamba, and Tarko.

These towns, all in northern Luzon, were "completely razed" and many natives were said to have been killed. In other towns of Luzon—Aragay, Camiling, and San Fernando—civilians were machine-gunned in the streets of the depopulated towns. A communique. It added that Japanese apparently chose Sundays and religious holidays for their blasting and the knowledge that great numbers of people would be attending church or be on the streets.

"The first attack was made on Sunday, Dec. 7, and on each subsequent Sunday and on Christmas and New Year's day enemy air attacks have been particularly heavy," the communique said.

## Agreements With Russia

### Polish Prime Minister Says They Will Mean Action

Gen. Wladyslaw Sikorski, Polish prime minister and commander in chief, returned from a visit to Russia and declared his agreements with Joseph Stalin "proved we have come to definite conclusions which mean action."

He said Poland was entering a sphere of "real politics where only facts count."

"The agreements concluded with Russia are a beginning to that kind of real policy which I hope will have the best results for the whole world," Gen. Sikorski said.

Among the agreements concluded in Russia was one governing the constitution of a Polish army on Russian soil.

### Supplies For Russia

Toronto.—Red Cross headquarters here has been informed that two Red Cross consignments of drugs, bandages and surgical accessories, part of Canadian aid to Russia, have left Britain for the Crimea.

## NO DOUBT OF THE OUTCOME IN THESE VICTORY SMILES

JAP BOMBERS KNEW THEIR TARGETS IN PEARL HARBOR RAID

Directed by what Frank Knox, secretary of the navy, described as the most effective fleet column work yet seen, Japanese bombers kept their targets with deadly accuracy when they staged their devastating surprise attack on the island of Oahu. In the upper picture is a U.S. pursuit plane, smashed like many others before it could get off the ground to meet the raiders. Below is the fleet station at Hickam Field, showing dire damage as they were useless for fighting the raid. Three ranking U.S. army and navy officers have been relieved of their Hawaiian commands until Washington learns why the island's defenders were unprepared for the attack.

## Snicklefritz-----

"Step up here, O'Brien, and let me  
have a good look at you."

"What's the idea?"

"I've got some 'insults' things to  
say to you, and I want to be able later  
on to identify you positively as the  
man who struck me."

"It was a few days after the big  
New Year's party when two friends  
met."

"Well, old man, how did you get  
along after I left you? Get home all  
right?" asked one.

"No, a confounded policeman took  
me to the station, where I spent the  
night."

"You were lucky I got home."

Sam, a colored gentleman, was being  
implied by a church committee of  
brethren to contribute to a special  
fund the church was trying to raise.

"Well," said one of the Brothers  
with the clinker of an argument,  
"don't you all think you owes de Lawd  
anything?"

"Oh, sure he does," said Sam, "only  
he can't pressin' me like mah other  
creditors."

Magistrate: "What induced you to  
strike your wife?"

Husband: "Well, your honor, she had  
her back to me, the broom was handy,  
and the back door was open, so I  
thought I'd take a chance."

EIGHT GOOD EXCUSES FOR NOT  
BUYING WAR SAVINGS STAMPS

- Because—
1. I don't like Mackenzie King.
  2. I don't like Aberhart.
  3. I don't like the man who sells the stamps.
  4. (for farmers) The price of wheat is too low.
  5. (for farmers) City and town people get paid too much.
  6. (for town folk) salaries are too low.
  7. (for town folk) Farmers get too much for eggs, pigs, cream, etc.
  8. I'm a miserable, selfish skin-flint who is not willing to deny himself anything for his country.

## 1942 Wheat Board Advance of \$.12; Proposed by Line Elevators

Your Local Line Elevators Association has  
a submission to Ottawa on behalf of Line Elevator  
Companies urging that the Government formulate  
a wheat policy for 1942 providing:

- (a) An initial payment for farmers delivering  
their 1942 wheat crop to the Canadian Wheat  
Board of \$1.22 1/2 per bushel basis One Northern  
delivered Fort William or Vancouver.
- (b) That the Government accept delivery of  
350,000,000 bushels of the 1942 wheat crop on  
this price basis.
- (c) That deliveries and sales of the 1942 wheat  
crop be segregated from the carry-over of past  
years and the carry-over be reserved to meet  
post-war and unforeseen war requirements.

A copy of the Line Elevator's submission to  
Ottawa may be obtained from any Line Elevator  
Agent or by writing to

## SAVE

THESE MATERIALS ARE  
VITAL TO WAR INDUSTRY  
METALS (of steel and iron)  
RAGS  
PAPER  
FATS AND BONES

All war industries need rags . . . handfuls of rags . . . pounds of rags . . . tons of rags. And you  
can help supply them.

Without rag rippers to clean the cutting lubricant from planes, railers, drills, lathes, Canadian war workers  
would be inefficient, their output reduced, their efforts hampered.

Without rags, explosive plants would slow up, airplane factories would find their production cut, and  
wheels of shell factories would dawdle.

Start an old-fashioned rag bag in your house today. All kinds of old, worn-out, too small and other-  
wise useless garments are badly needed by war industries—everything from cotton underwear to old  
shirts and ties—from Grandpa's red flannel to Grandma's seamless corsetry pants.

These are real treasures of war which you can supply. Every rag in your home should go to war industries  
through your Salvage Committee. Clean out and clean up on Rags!

## BRITAIN'S LATEST FIGHTER

New facts about Britain's latest  
fighter aircraft, the Hawker Typhoon,  
disclose that it has more speed, great-  
er firing power and heavier armament  
than any single-seater fighter yet de-  
signed. With a longer range than the  
Hurricane or Spitfire, it will be able  
to penetrate much further into enemy  
country.

Created by Sidney Camm, who gave  
Britain's Royal Air Force the Hurri-  
cane, the Fury and the Hart, each  
supreme in its day and class, the Ty-  
phoon is a compact low-wing mono-  
plane equipped with a Napier-Sabre  
24-cylinder H-Type engine.

The world's most powerful aero-

A police surgeon in Philadelphia

motor, the Sabre develops 2,350 horse  
power for take-off and 1,800 horse  
power at rated height, and gives a  
top speed of over 400 miles per hour,  
with a very high rate of climb. This

engine, which develops more power  
than the engine which pulls the cele-  
brated London to Edinburgh train, the  
Royal Scot, is expected to make air-  
craft history.

## WARTIME WAGE CONTROL

Instructions to Canadian Employers and  
Employees concerning the Wartime Wages  
and Cost of Living Bonus Order, P.C. 6235.

THIS ORDER of the Dominion Government—  
which under the War Measures Act establishes  
wage rates and requires employers to pay a cost  
of living bonus—provided for the establishment  
of National and Regional War Labour Boards  
to administer the Government's policy.

## National Employers

Communications from employers and employees  
in the following employments should be ad-  
dressed to the Secretary, National War Labour Board,  
Ottawa:

- (1) the operation of lines of steam or other ships, railways,  
canals or telegraphs, including all service auxiliary  
thereto, connecting any province with any other or  
others of the provinces or extending beyond the limits  
of the province;
- (2) the operation of any system of air, bus or truck  
transportation connecting any province with any other or  
others of the provinces or extending beyond the limits  
of the province;
- (3) the operation of any electrical power or transmission  
works connecting any province with any other or others  
of the provinces or extending beyond the limits of any  
province, or serving two or more provinces;
- (4) mining;
- (5) the operation of any shipyard;
- (6) all undertakings located in the Yukon or Northwest  
Territories.

## Regional Employers

Employers and employees in employments other  
than those above designated should address their  
communications to the Regional War Labour Board  
Board in care of their respective provincial  
governments.

The Order provides that no increase or  
decrease in a basic scale of wage rates may  
be made by any employer. Violations of  
this Order are subject to penalties.

Extracts from the Order and the Board's  
Interpretative Rulings are given in the  
National War Labour Board's Bulletin No. 1,  
which may be obtained on application to any  
Regional War Labour Board.

HUMPHREY MITCHELL  
Minister of Labour and Chairman  
The National War Labour Board  
Ottawa, Canada, January 19, 1942
